

## Self-Installation Kit Installation Instructions

### Standard Digital or DVR Converter

Use the connection diagram and follow the below steps to connect the Digital Converter.

1. Unplug all electronic devices before connecting the Digital Converter.
2. Connect the coaxial cable coming from the wall to the Cable In on the back of the Digital Converter.
3. Connect the coaxial cable from the Cable Out on the back of the Digital Converter to the Cable In on the back of the TV.
4. Plug the Digital Converter and the TV into an AC power source.

Important: Do not press the Power key on the Digital Converter yet.

**Note:** You may be able to reduce the risk of damage from voltage surges, which can be caused by lightning storms and power outages, by plugging the Digital Converter into a surge protector.

5. Turn on your TV and set it on the input channel assigned by your cable service provider (channel 3 or 4).
6. Wait several minutes for the Digital Converter to receive the latest software, programming, and service information. When the current time displays on the front panel of the Digital Converter, that indicates that the update is complete:

**Note:** If four dashes or a Not Authorized statement displays, please call your service provider to get the Digital Converter authorized.

7. To begin watching TV, press Power on the front panel of the Digital Converter or press Power on the remote control.
