Read this first

The BR-350 will operate Pioneer’s Voyager series of digital home terminal. It also supports basic remote control functions for nearly all TVs and VCRs. This instruction sheet contains setup instructions. Keep this sheet to set up the BR-350 remote.

BR-350 keypad

The BR-350 operates your Voyager Home Terminal, TV and VCR. Certain keys only work on certain devices. Keys that work together are clustered to make them easier to locate.

Each key is described below. The device(s) in parentheses following each key name are those the key will operate. For example, note that item 11 below (CH +/-) will only operate the channel selection on the Voyager terminal, not the TV or the VCR.

1 Indicator light

Blinks when the remote transmits a command. Also used during setup.

2 TV, VCR, CBL: Device power keys (TV, VCR, Voyager)

Turns power of these devices on/off.

3 GUIDE: Interactive program guide key (Voyager)

Brings up the program guide listings.

4 CH +/-, 0 – 9: Numeric keys (Voyager)

Directly tunes channels by number. Also for numeric entries in on-screen menus.

5 0 – 9: Numeric keys (Voyager)

Tunes channels previously stored in the Voyager terminal’s favorite channel memory.

6 CH +/-: Channel rocker key (Voyager)

Selects the next higher or lower channel.

7 VOL +/-: Volume rocker key (TV or Voyager)

Rises or lowers the sound level.

8 INFO: Information key (Voyager)

Displays information about the program currently playing or displayed in the Guide.

9 PAGE +/-: Page access rocker key (Voyager)

Accesses pages above or below the information currently displayed.

10 EXIT: Exit key (Voyager)

Hides all on-screen graphics and returns you to regular TV viewing.

11 CH +/-: Channel rocker key (Voyager)

Selects the next higher or lower channel.

12, A, B, C: Function keys (Voyager)

Makes direct selections from on-screen menus.

13 CH +/-: Channel rocker key (Voyager)

Selects the next higher or lower channel.

14 0 – 9: Numeric keys (Voyager)

Tunes channels previously stored in the Voyager terminal’s favorite channel memory.

15 GUIDE: Program guide key (Voyager)

Brings up the program guide listings.

16 Record key (VCR)

Starts the record function of your VCR.

17 VCR/VOD/VCR/VOD toggle switch

Determines the code transmitted by the BR-350. The BR-350's transport keys (15) and the pause key (19). In the VCR setting, these keys send transport commands to your VCR. In the VOD setting, setting, they allow pausing, scanning forward, skipping backward, stopping and resuming play of a current Video-On-Demand program.

18 LAST: Last channel recall (Voyager)

Accesses the previously tuned channel.

19 CH +/-: Channel rocker key (VCR or Voyager)

Rises or lowers the sound level.

20 BYPASS: RF Bypass key (Voyager)

Activates the Voyager’s optional RF bypass switch.

21 TV/VCR/VCR/VCR key (VCR)

Activates the VCR’s TV/CVR switch.

Programming the BR-350

Set Up for Voyager Home Terminal

No setup is required. The BR-350 is ready to run the Voyager Home Terminal. If for some reason, the Voyager terminal does not respond to the BR-350, first try re-entering the setup code.

1 Turn on the Voyager terminal.

2 Point the BR-350 away from the terminal.

3 Press and hold CBL and SELECT at the same time, until the indicator light blinks twice.

4 Enter 9 9 1. Indicator light blinks twice.

Point the BR-350 toward the terminal.

6 Press CBL. The terminal should turn off. The BR-350 will now operate the Voyager terminal.

Searching the code library

1 Turn on TV.

2 Point the BR-350 away from the TV.

3 Press and hold TV and SELECT at the same time until the light blinks twice.

4 Enter the three-digit code. Indicator light blinks twice.

5 Point the BR-350 toward the TV.

6 Press TV. Did the TV turn off?

Yes: Setup complete. Write down the three-digit setup code below for future reference.

No: Try setup again starting from step 2, using the next code listed for your brand. If you’ve tried all codes for your brand without success, use the method under Searching the code library.

Searching the code library

If none of the listed TV or VCR codes work, you can enter a code that searches the library of codes. The remote control automatically selects the proper code for your TV or VCR. Make sure your TV or VCR is on before you program the remote control.

1 Turn on the TV.

2 Point the remote control away from your TV.

3 Press and hold TV and SELECT at the same time until the LED on the remote control blinks twice.

4 Press 9 9 1. The light blinks twice.

5 Point the remote control at your TV and press TV. Did the TV turn off?

Yes: Immediately press SELECT. The light blinks twice. Setup is complete. To make sure programming was done correctly, aim the remote at the TV and press TV. The TV should turn back on. Note: Now, be sure to follow (Setting your codes), to find out the direct setup method in the future.

No: Repeat step 2 until TV turns off. You may need to do this up to 50 times to go through the entire code library.

To search the library of VCR codes:

Follow the procedure above, but substitute "VCR" for "TV" in each step.

My TV setup code is: 

---

Insert two fresh AA alkaline batteries, in the directions shown inside the battery compartment.

Replace the battery cover.

Getting your code

If you've used the **Searching the code library** method to program your BR-350, or if you've misplaced your setup code, you can find out the loaded TV and VCR codes.

To get the TV code:

1. Point the remote control away from the Voyager HomeTerminal, TV, and VCR.
2. Press and hold TV and press SELECT at the same time until the light blinks twice.
3. Press 9 9 3, then press TV. The light blinks twice.
4. To make sure programming was done correctly, aim the remote at the TV and press VOL +, VOL –, or MUTE. The volume setting on the TV should change.

Helpful hints

Setup

If the BR-350 does not operate the TV or VCR properly, or it operates some but not all of the remote control commands:

1. Try all the codes listed for the device.
2. Try the search method. Many devices use similar remote control codes. While searching the library, you may look onto a similar code for which only some commands work. **Use the Searching the code library method over. Repeat the process to find the correct code.**
3. Replace both batteries with two new AA alkaline batteries. Replace both batteries at the same time.

Operation

If the red indicator light does not blink when you press a key, or if the operation is intermittent:

- Replace both batteries with two new AA alkaline batteries.
