Navigator Remote
Overview of the Navigator

The Navigator is designed to operate up to four separate electronic devices. It is guaranteed to operate infrared controlled TVs, VCRs, cable boxes, and many audio components.

Setting Up Your Equipment
Turning On & Off Your Cable Service

Volume Lock
Programming the Tune-In Buttons
Button Descriptions

Setting Up Your Equipment

To setup your equipment:

1. Turn on the device (TV, VCR, cable, etc.).
2. On your Navigator, press and release the button for your device.
3. Press and hold the SETUP button until the red light flashes twice and then release the SETUP button.
4. Press the first three-digit code found next to your brand. The red light will flash twice to indicate this was done correctly.
5. Now aim your Navigator at your device and press the POWER button. If your device turns off, you have found the right code. If your device does not turn off, repeat steps 4 - 6 using the next code listed for your brand of TV.

Note: Some devices either do not have a POWER button, or have separate buttons for the ON/OFF function. On these devices, you will want to use a different function to test the code. For instance, for VCR, LD, and CD players, it is best to have the unit on. Put a tape or disc in the device. Use the PLAY button to test the code.

Turning On & Off Your Cable Service

To turn on your cable service:

1. Press TV button.
2. Press POWER button. (Wait to see the picture.)
3. Press CABLE button.

To turn off your cable service:

1. Press TV button.
2. Press POWER button.

Changing the Device Buttons

You can make the AUX button a TV button or Audio Component Button. To to customize your remote:
1. Press and release the **AUX** button.

2. Press and hold the **SETUP** button until the red light flashes twice and then release the **SETUP** button.

3. Press the following buttons: **9**, **9**, and **2**. The red light will flash twice, indicating this was done correctly.

4. Press and release the **TV** button followed by pressing and releasing the **AUX** button. The red light will flash twice, indicating this was done correctly.

5. Your **AUX** button is now set up to be programmed for another TV or Audio component (if the component has remote capabilities). Follow the sequence above for entering your TV code.

Returning the **AUX** Button to **AUX**:

To return a device button back to its original function:

1. Press and release the **AUX** button.

2. Press and hold the **SETUP** button until the red light flashes twice and then release the **SETUP** button.

3. Press the following buttons: **9**, **9**, and **2**. The red light will flash twice, indicating this was done correctly.

4. Press and release the **AUX** button followed by pressing and releasing the **AUX** button. You will receive two flashes from the red light to indicate this was done correctly.

5. Your **AUX** button is now reprogrammed for **AUX**. Follow the setup sequence above for setting up a device on this button.

**Back to Top**

**Volume Lock**

This feature allows you to decide which device will control your volume, whether it is the TV or CABLE converter. To control the volume through your cable converter:

1. Press and hold the **SETUP** button until the red light flashes twice and then release the **SETUP** button.

2. Press the following buttons: **9**, **9**, and **3**. The light will flash twice indicating that this was done correctly.

3. Press and hold the **CABLE** button. Your remote control will now control the volume through the cable converter.

To return the volume control to the TV mode:

1. Press and hold the **SETUP** button until the red light flashes twice and then release the **SETUP** button.

2. Press the following buttons: **9**, **9**, and **3**. The red light will flash indicating that this was done correctly.

3. Press and release the **TV** button. Your remote control will now control the volume through the television.

**Back to Top**

**Programming the Tune-In Buttons**

The three Tune-In buttons should already be preprogrammed for specific
channels. However, if you would like to delete them and add in your own preferences, follow these steps.

Deleting the Tune-In buttons (Deprogramming):

1. Press and hold the **SETUP** button until the red light flashes twice and then release the **SETUP** button.
2. Press the following buttons: 9, 9, and 5. The red light will flash twice, indicating this was done correctly.
3. Press and release the Tune-In button you want to clear.
4. Press and hold the **SETUP** button until the red light flashes twice and then release the **SETUP** button. The Tune-In button is now ready to be programmed.

Adding in the Tune-In Buttons:

1. First you will want to delete what is currently programmed on each Tune-In button.
2. Press and hold the **SETUP** button until the red light flashes twice and then release the **SETUP** button.
3. Press the following buttons: 9, 9, and 5. The red light will flash twice, indicating this was done correctly.
4. Press and release the Tune-In button you want to program.
5. Press and release the **CABLE** button, followed by the channel you want to program onto this Tune-In button.
6. Press and hold the **SETUP** button until the red light flashes twice and then release the **SETUP** button.
7. Now when you press the Tune-In button, your cable box will change to that desired channel.

Note: Each Tune-In button can store up to three channels. To add a new channel, repeat steps 2 - 6 substituting the next desired channel in step 5. Each time you press this Tune-In button, you will cycle through each channel programmed onto it, the fourth button press will return you to the channel first programmed.

Clearing out a Device:

If difficulties arise when programming a device, follow these steps:

1. Press and hold the **SETUP** button until the red light flashes twice and then release the **SETUP** button.
2. Press the following buttons: 9, 9, and 2. The red light will flash twice, indicating this was done correctly.
3. Press and release the **DEVICE** button. The red light will flash once, indicating this was done correctly.
4. Press and release the same **DEVICE** button. The red light will flash twice, indicating this was done correctly.

Clearing out a Button:

If you are having difficulties with buttons on the remote responding, follow these steps:

1. Press and hold the **SETUP** button until the red light flashes twice and then release the **SETUP** button.
2. Press the following buttons: 9, 9, and 4. The red light will flash twice, indicating this was done correctly.

3. Press and release the key you wish to clear.

4. Press and release the same button. The red light will flash twice, indicating this was done correctly.
