User's Guide for the 4-in-1 Cable TV Remote Control for Scientific-Atlanta® Explorer Set-Top Boxes

Congratulations!
This four mode remote control has been programmed to control your Scientific-Atlanta set-top box and can be programmed to control up to three additional entertainment components by following these easy instructions.

Before you Begin
Please plug your television power cord into a separate wall outlet instead of the power outlet on the cable box. Tune your television to channel 2, 3 or 4 as directed by your cable provider.

Install Batteries
Two AA alkaline batteries must be installed before you can program or operate the remote control.
1. Remove the battery compartment cover located on the back of the remote control.
2. Place the batteries in the compartment in positions matching the picture below.
3. Replace the battery compartment cover.

Using this guide in conjunction with your cable set-top box manual:

Power selection, press the DEVICE key for that device and immediately press the POWER key.

SmartScan™ automatic Programming
SmartScan™ will allow you to easily try all the available programming codes for the selected device and find the best match. If you prefer manual programming or already have the device you wish to program from the table listed below. Press and release the number key that matches the prefix code.

7 Programming Volume Control
By default, your Adelphia remote controls volume through the TV. To allow volume control through a different device:

1. Press and hold the CBL device key until all the device keys begin to flash. Release the CBL key. The CBL key will continue to flash.
2. Press and release the VOLUME UP key, the CBL key will remain on.
3. Press and release the VOLUME DOWN key. The CBL key will turn off when VOLUME DOWN is pressed, and will turn on when released.
4. Press and release the key corresponding to the device you wish to use to control volume (CBL or AUX). After you release the key, the CBL key will flash three times and turn off.

To return volume control to the default state:

1. Press and hold the CBL device key until all the device keys begin to flash. Release the CBL key. The CBL key will continue to flash.
2. Press and release the VOLUME UP key. The CBL device key will stop flashing and stay on.
3. Press and release the VOLUME DOWN key, and then press and release the SEL key. After you release the SEL key, the CBL device key will flash three times and turn off.

Master Power Control
The Master Power function allows you to turn off and on two or more devices simultaneously with a single press of the power button. The following steps describe how to program the Master Power Control function:

1. Press and hold the CBL device key until all the device keys begin to flash. Release the CBL key. The CBL key will continue to flash.
2. Press and release the POWER key.

Test the code by trying various functions. If the primary function keys fail to respond satisfactorily try the next code listed for the manufacturer.

If you have tried all the codes listed for the manufacturer and the device does not respond, try to program the device using SmartScan™ as described in section 5. Remember to record your device codes in section 11 when you are done.

Know Your Remote
The diagram below provides a brief description of each key on your Adelphia remote control. The function descriptions will allow you to become more familiar with your remote. Functions may vary between different services. Please refer to your set-top box manual for descriptions of specific functions.

Section 12. Once you find the code, perform the following steps:

1. To manually set up the Adelphia remote to operate a device, find the manufacturer of the device in the list of manufacturers’ codes. The codes are logically grouped by device type in section 12. Once you find the code, perform the following steps:
2. Press and hold the device key to be programmed until all device keys begin to flash (approximately 3 seconds). Release the key. The selected device key will continue to flash.
3. Enter the four digit code for the desired device using the number keys. After pressing the first digit, the device key will light and remain on. After the last digit is pressed the device key will flash three times and turn off. You will not see any flashes if the code has failed.

Congratulations!
This four mode remote control has been programmed to control your Scientific-Atlanta set-top box and can be programmed to control up to three additional entertainment components by following these easy instructions.

Before you Begin
Please plug your television power cord into a separate wall outlet instead of the power outlet on the cable box. Tune your television to channel 2, 3 or 4 as directed by your cable provider.

Install Batteries
Two AA alkaline batteries must be installed before you can program or operate the remote control.
1. Remove the battery compartment cover located on the back of the remote control.
2. Place the batteries in the compartment in positions matching the picture below.
3. Replace the battery compartment cover.

SmartScan™ automatic Programming
SmartScan™ will allow you to easily try all the available programming codes for the selected device and find the best match. If you prefer manual programming or already have the device you wish to program from the table listed below. Press and release the number key that matches the prefix code.

7 Programming Volume Control
By default, your Adelphia remote controls volume through the TV. To allow volume control through a different device:

1. Press and hold the CBL device key until all the device keys begin to flash. Release the CBL key. The CBL key will continue to flash.
2. Press and release the VOLUME UP key, the CBL key will remain on.
3. Press and release the VOLUME DOWN key. The CBL key will turn off when VOLUME DOWN is pressed, and will turn on when released.
4. Press and release the key corresponding to the device you wish to use to control volume (CBL or AUX). After you release the key, the CBL key will flash three times and turn off.

To return volume control to the default state:

1. Press and hold the CBL device key until all the device keys begin to flash. Release the CBL key. The CBL key will continue to flash.
2. Press and release the VOLUME UP key. The CBL device key will stop flashing and stay on.
3. Press and release the VOLUME DOWN key, and then press and release the SEL key. After you release the SEL key, the CBL device key will flash three times and turn off.

Master Power Control
The Master Power function allows you to turn off and on two or more devices simultaneously with a single press of the power button. The following steps describe how to program the Master Power Control function:

1. Press and hold the CBL device key until all the device keys begin to flash. Release the CBL key. The CBL key will continue to flash.
2. Press and release the POWER key.

Test the code by trying various functions. If the primary function keys fail to respond satisfactorily try the next code listed for the manufacturer.

If you have tried all the codes listed for the manufacturer and the device does not respond, try to program the device using SmartScan™ as described in section 5. Remember to record your device codes in section 11 when you are done.

Know Your Remote
The diagram below provides a brief description of each key on your Adelphia remote control. The function descriptions will allow you to become more familiar with your remote. Functions may vary between different services. Please refer to your set-top box manual for descriptions of specific functions.

Section 12. Once you find the code, perform the following steps:

1. To manually set up the Adelphia remote to operate a device, find the manufacturer of the device in the list of manufacturers’ codes. The codes are logically grouped by device type in section 12. Once you find the code, perform the following steps:
2. Press and hold the device key to be programmed until all device keys begin to flash (approximately 3 seconds). Release the key. The selected device key will continue to flash.
3. Enter the four digit code for the desired device using the number keys. After pressing the first digit, the device key will light and remain on. After the last digit is pressed the device key will flash three times and turn off. You will not see any flashes if the code has failed.
9 Channel Lock

Channel Lock causes channel up and down functions to always operate the set top box independent of the device (TV, VCR, or DVD) currently selected. If you want the remote to control the channel function on your TV or VCR, you will need to deactivate Channel Lock:

1. Press and hold the CBL device key until all the device keys begin to flash (approximately 3 seconds). Release the CBL key. The CBL key will continue to flash.
2. Press and release the CHANNEL UP key.
3. Press and release the CHANNEL DOWN key.
4. Press the SEL key. The CBL device key will flash three times to confirm the procedure.
5. Repeat these steps to reactivate Channel Lock.

10 Recalling a Device Code

Use the following steps to read the code set for a device. This is useful for determining a device code that was set using the SmartScan procedure described in section 5:

1. Press and hold the device key to be read until all device keys begin to flash (approximately 3 seconds). Release the key. The selected device key will continue to flash.
2. Press and release the SEL key. The device key flashes each of the four digits in the code. A pause separates each digit. For example, three flashes represent the number 3, and a rapid flicker represents 0. A code of 1032 will be shown as:

FLASH (pause) Flicker (pause) FLASH... FLASH... FLASH (pauses) FLASH...

Count and record the sequence of flashes to determine the four-digit code.

11 Record Your Device Codes

Now that you have programmed your remote control, write the codes below for later reference:

TV Code: __________ Audio Code: __________
VCR Code: __________ DVD Code: __________
AUX Code: __________ Other Code: __________

If necessary use the recall instructions to determine the code.
